S.W.O.T ANALYSIS

By Omar, Kobi, Sam and Simon

What is SWOT

SWOT is a simple planning tool for assessing a situation before making strategy decisions. SWOT = Strengths, Weaknesses, Opportunities, Threats.

The Two Axes

SWOT puts every factor into a grid using two questions.

Axis 1: Is it ours or from outside?

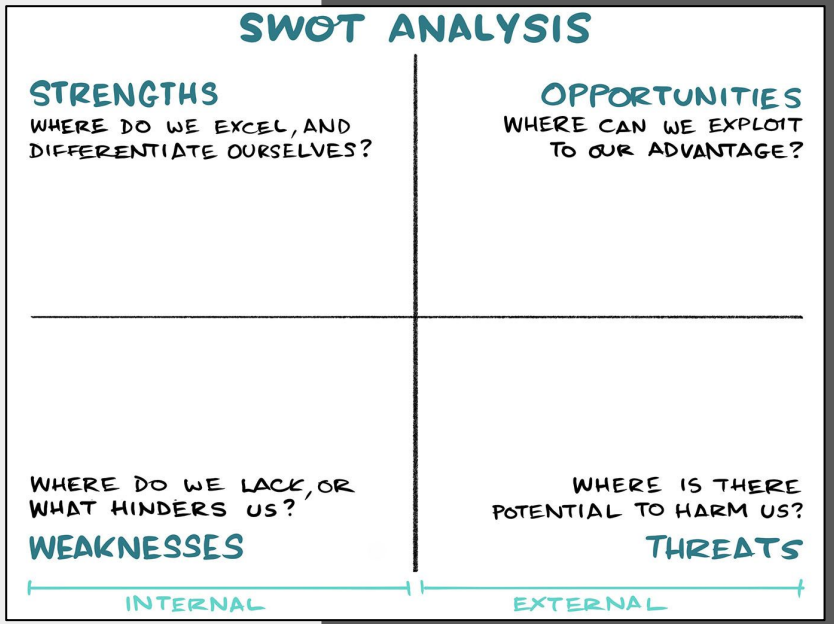

Ours = Internal is Strengths and Weaknesses

Outside = External is Opportunities and Threats

Axis 2: Is it good or bad for us?

Good is Strengths and Opportunities

Bad is Weaknesses and Threats

Strengths

Strengths

Strengths are internal helpful factors what we already do well or have going for us and can build on.

Questions to ask:

-What advantages or resources do we have?
-What skills or knowledge are we good at?
-What do others say we do well?
-What do we have that competitors lack?

Our Example is a Lemonade Stand
-Great recipe
-Friendly, fast service
-Good spot on the corner

Weakness

Weaknesses

Weaknesses are internal harmful factors gaps or limitations within our control that hold us back and that we can fix.

Questions to ask
- What do we lack money time skills and staff?
- What do we do poorly or avoid?
- What complaints or problems keep coming up?
- Where are we behind competitors?

Our Example is a Lemonade Stand
- Only $20 to spend
- No fridge, so ice melts fast
- Only one person working

Opportunities

Opportunities are external helpful factors conditions outside our control that we can take advantage of.

Questions to ask:
- What trends or changes could benefit us?
- Is there an unmet need or gap we could fill?
- Are there partnerships funding or resources available?
- Is anything shifting in our favor rules market and technology?

Our Example is a Lemonade Stand
- Hot week forecast
- School event nearby
- No other stand on the block

Threats

Threats

Threats are external harmful factors outside risks we don't control but should plan for.

Questions to ask:

-Who or what could take away our customers or support?
-Are competitors or prices changing?
-Are rules costs or technology shifting against us?
-What outside events could disrupt us?

Our Example is a Lemonade stand
-Shop opening nearby
-Rain forecast
-Council rules on selling on the street
